

Want to keep your gear working like new?

Over time clothing, footwear and equipment loses performance as its water-repellent finish, (DWR) applied at manufacture, wears away – allowing rain to wet-out fabric and reducing breathability. Granger's products restore the DWR using the same technology as all major manufacturers allowing your gear to work like new – 'original performance restored'.

Independent tests of Granger's products

At Granger's we believe that independent accreditation is the only true way to demonstrate our credentials. For independent testing we use Satra, a leading authority on testing for footwear, leather goods and apparel. For more information about Satra please visit: www.satra.co.uk

Clothing Test

Test method: SATRA TM 201: 1999. Water and Oil Repellency. The products were applied as per manufacturers instructions to a supplied fabric and then allowed to air dry.

SATRA's Conclusion:

"Granger's XT proofer has given the best results, for water and oil repellency"

Sample reference	Treatment details	Repellency	
		Water	Oil
Untreated Fabric	None	<1	<1
Granger's XT Proofer	Spray-on	5	4
Competitor Proofing Spray	Spray-on	2	<1

Footwear Test

Test method: SATRA TM 201: 1999 Water and Oil Repellency. The products were applied as per manufacturers instructions to a supplied leather and then allowed to air dry.

SATRA's Conclusion:

"With regard to water repellency Paste Wax has given the highest (possible) value of 8 with G-Max Universal proofer performing similarly with a result of 7".

Sample reference	Treatment details	Repellency	
		Water	Oil
Untreated Fabric	None	<1	<1
Granger's G-Max Universal Footwear Proofer	Sponge-on	7	1
Competitor Waterproofing Wax	Sponge-on	3	<1
Granger's Paste Wax	Tube Applicator	8	1
Competitor Waterproofing Wax	Tube Applicator	3	<1

Key to scale – Water repellence is on a scale from 1 to 8, with a score of 1 indicating no repellency and a score of 8 indicating the highest repellency.

At Granger's we take our environmental responsibility seriously. That's why we're the only aftercare company to be both ISO 14001 accredited and a bluesign® system partner. www.bluesign.com
